

AquaAroma Crema

A water filter optimized for mobile coffee machines

The AquaAroma Crema filter cartridge reduces carbonate hardness in drinking water to protect coffee and espresso machines against scale build-up. In addition, the filter material reduces the level of substances that impair the smell and taste such as chlorine.

With the AquaAroma Crema the taste can be optimized by adjusting the Aroma Ring setting to the local carbonate hardness. The cartridge filters the water just shortly before brewing.

The benefits to you

- Reduces the costs of maintaining and/or repairing the coffee or espresso machine
- Easy filter exchange - simply by the user
- The filtration can be adjusted by the Aroma Ring according to the local water hardness
- Provides constant water pressure and temperature during brewing

VIVREAU®

Pure coffee enjoyment

The filter cartridge is suitable for use in coffee and espresso machines with an integrated water tank. The interface of the water tank should ideally be molded in a way so that it can host the cartridge directly – otherwise an adapter must be used. The water flow is ensured via a suction pump in the coffee machine.

The Aroma Ring of the AquaAroma Crema adjusts the filter performance perfectly to the local water conditions. To identify the right adjustment for the respective hardness, an indicator strip will be delivered with every cartridge.

The food safety of Vivreau Professional water filter products is tested and monitored by independent institutes.

Cartridge tested and certified by NSF International according to NSF/ANSI 42 for material safety only.

AquaAroma Crema				
Technology	Decarbonization			
Dimensions	1.6/4.2/2.3 inch (W/H/D)			
Water intake temperature	39 - 86 °F			
Typical capacity - taking account of the local carbonate hardness				
Aroma Ring setting	Cups 1.2 oz	Cups 5 oz	Definition	Capacity ¹
Position A	6,300	1,470	soft water	58.1 US gallons
Position B	4,300	1,000	medium hard water	39.6 US gallons
Position C	2,300	540	hard water	21.1 US gallons
Order Number				
Filter cartridge	1041746 (Pack 1) 1041747 (Pack 60)			
Explanatory notes	¹ The capacities given have been tested and calculated on the basis of normal application and machine conditions. Due to external influences (e.g. varying water quality, usage and/or machine type) deviations from these results can occur.			

Only drinking water quality may be used as the water supply for Vivreau water filters.
