# $\mathsf{VIVREAU}^{^{\circ}}$

WITHOUT HOT WATER

# Extra C-Tap 2 Cut Sheet

The most versatile water dispenser on the market. With four water types, it combines functionality with a sleek, modern design.

# Project: Item#: Quantity: \_

## Standard features:

**Options & Accessories:** Easy Access Panel

- Four water types: unchilled and chilled still, chilled semi-sparkling and sparkling on demand
- Vivreau's ThermalGate™ feature protects against retrograde contamination from external
- Low energy consumption: features boiler standby/ night modes

Waste water container (if drain pipe is not available)

### Ideal for:

Offices, Executive Lounges, Staff Rooms, Wellness and Spa Areas

## Average output capacity:

Cold water: 85 l/h, 22 gal/h

AMBIENT

**SPARKLING SPARKLING** 

**Specifications** Design Tap system 16  $^{1/4}$  x 8  $^{1/4}$ ; 2  $^{3}$ 4 inch (H x D; Diameter) Unit dimensions (W X H X D) Weight 5.5 lbs (tap) | 84 lbs (cooler carbonator) Millwork and Ventillation Fits into base cabinet with the following 24 X 29 <sup>1/2</sup> X 24 inch dimensions (W X H X D) Tap height plus additional 4" clearance for operation Tap head clearance NOTE: Tap must be mounted directly above the main system **Electrical Electrical Requirement** (1) 20amp electrical circuit GFCI recommended (NEMA 5-20R) 120V, 60Hz (11 amps) CO<sub>2</sub> If connecting to a bulk or existing CO2 system, a CO2 line terminating at a 1/4" barbed shutoff valve must be available CO2 Tank (customer supplied) within 40" of the System installation site, 100psi minimum pressure. **Plumbing** 1 potable 1/2" cold water supply terminating in a 1/2" ball valve with a 1/2" female pipe thread Water connection Waste water connection Waste water pipe or Waste water container Drain to connect 1/2" ID - 3/4" OD drip tray tube Drip Tray Drain 50 PSI Minimum water pressure 80 gallons, 302.8 L per hour Minimum water flow

### NOTE:

Any incoming water temperature above 60°F (15.5°C) will severely compromise the ability for the system to maintain a cold water supply.

### Consultant specification:

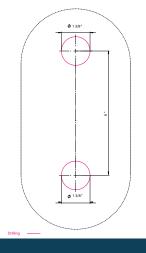

Water Dispensing System, single tap, 13" dispensing height, mains-fed, fully-integrated undercounter cooler/carbonator, 4 water types - ambient, chilled still, medium sparkling, classic sparkling water. 22.5 gallons/hour cold water output. Aquastop anti-leak sensor, standard ThermalGate retrograde protection, ETL and NSF certified, natural refrigerant R290, 510W max power consumption (30"W x 30"D x 24"H cabinet space required for installation)

# Extra C-Tap Worktop Cutout

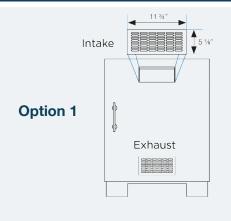

THIS DRAWING IS NOT TO SCALE

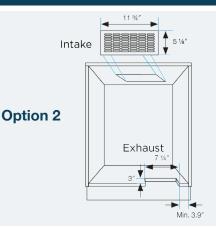

# Approved Methods of Cabinet Ventilation

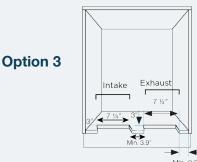

The cabinet requires **two vents**, **one for exhaust** and **one for air intake**. The exhaust is on the front of the chiller and comes standard with a shroud that forces the hot air down. If the base cutout is not possible the shroud can be replaced with an optional air guide plate that pushes the air forward requiring a matching cut out in the door. The intake requires a 24 square inch opening to let fresh air in a free and unobstructed area.
